

Bsafe/Enterprise Security for MVS TCP/IP

Easy Network Access Control
for the MVS environment

Mainframe Compliance with PCI-DSS, SOX, HIPAA and others

- Protection from unauthorized Telnet access
- Protection from unauthorized FTP access
- Integration with RACF
- Granular control of permissions by user and function
- User access controlled by file, library and application
- Group permissions by IP address, RACF group and other user groups
- Clear and easy-to-understand audit log

Bsafe/Enterprise Security for TCP/IP answers the need for internal controls for the protection of your data. It addresses the difficult demands of industry and legal regulatory compliance like PCI, SOX and HIPAA and allows you to ensure privacy through simple definitions made through intuitive PC-based screens

for MVS TCP/IP

Protection from Unauthorized Telnet and FTP Access

Bsafe/Enterprise Security for TCP/IP is vital where your users are distributed around different sites and when you need to transfer files to and from remote locations.

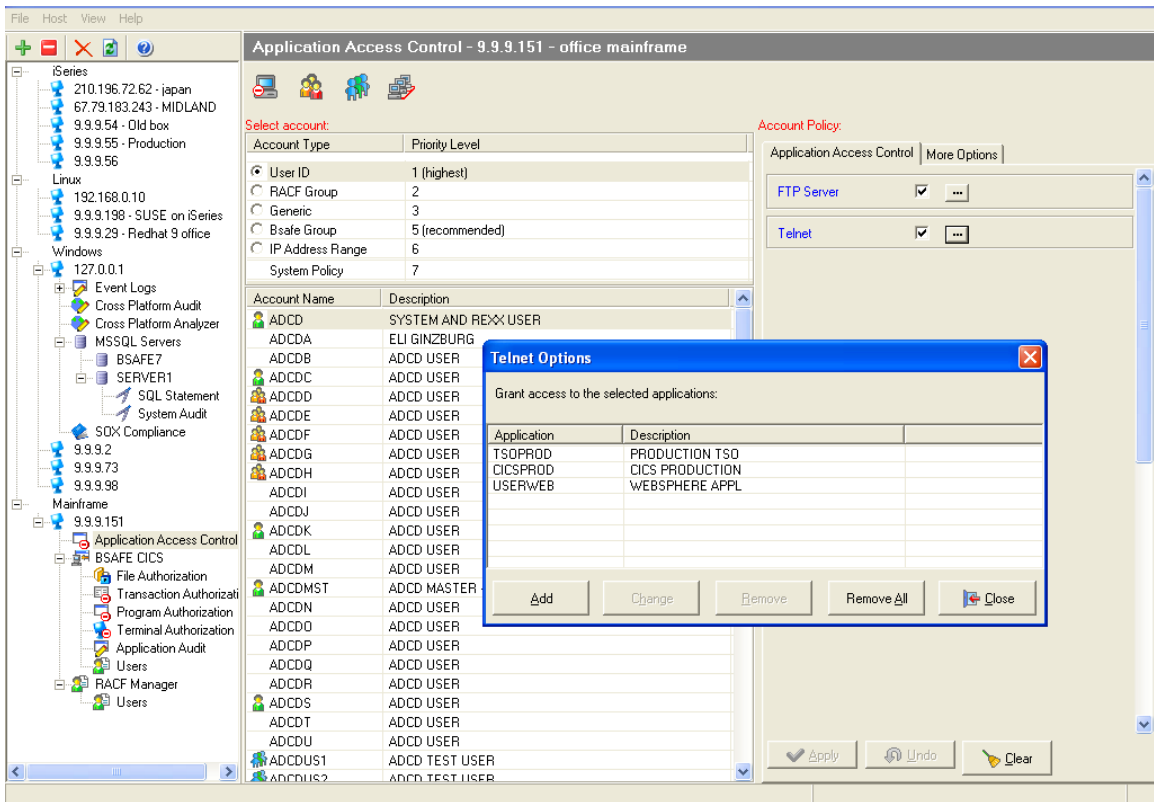

Lock down your system against Telnet and FTP activity from unwelcome destinations and unauthorized users in the most flexible and easy-to-use way available.
